Executive Summary

STRENGTHS

- * No active brand impersonation or typosquat domains detected.
- * No exposed admin or management interfaces found.
- * 1 third-party vendors detected - none rated high-risk.

WEAKNESSES

- * 2 critical findings require immediate remediation.
- * Email security posture is weak - spoofing risk remains elevated.

PRIORITY ACTIONS

- 1 Fix DNS Configuration - Ensure A records are published for your domain pointing to your server's IP address.
- 2 Install a TLS Certificate - Enable HTTPS using a free certificate from Let's Encrypt via Certbot, or through your hosting provider.
- 3 Restrict Administrative Interfaces - Limit the following admin interfaces to trusted IP ranges or protect with a VPN or MFA: app.cybermeters.com.
- 4 [Email Security] Missing SPF record - any server can send mail as this domain
- 5 [SSL & Certificates] HTTPS is not available - all traffic is unencrypted
